

Anatomical dissection and grafting procedures on human specimens.

Guided implant placement,
live surgery procedures.

In association with the University Hospital for Cranio Maxillofacial and Oral Surgery, the CMF Institute Vienna and the Anatomical Institute of the Medical University of Vienna.

Course Directors:
Prof. Dr. Dr. Rolf Ewers
Dr. Dr. Astrid Reichwein
Dr. Rudolf Seemann
Dr. Norbert Fock

VIENNA, Austria,
March 19–21, 2009

(validated by the Österreichische
Zahnärztekammer ZFP-OZÄK)

Ladies and Gentlemen,

This three-day course is designed for surgically active practitioners, who want to enhance their experience in GBR and grafting/bone harvesting techniques. Comprehensive information on the human cranial and oral anatomy will be given in a theoretical session.

Extensive hands-on exercises on human cadaver specimens will be performed. Nerve and artery preparation/dissection, graft harvesting procedures utilizing standard preparation techniques and piezo surgical equipment, sinus elevation and bone splitting procedures including implant placement will be exercised.

Each participant will spend one day in the dissection laboratory. In a live surgery, 3D-planned and guided implant placement will be demonstrated in the CMF Institute and CAMLOG Competence Center.

The level of this course is advanced to complex.

On Thursday evening, we are going to have dinner together in a "Heuriger", an exceptional type of restaurant only to be found in Austria in general and in Vienna's "Grinzing" district, in particular. The word "Heuriger" is so specifically Austrian that no English term exists for it. It is the name given to a wine tavern and restaurant, where patrons can experience a unique atmosphere of "Gemütlichkeit" and where originally only the most recent year's wine was served. There is also a specific kind of music and special food typical for a "Heuriger".

Program

Thursday, March 19, 2009

9am–5pm

Theory

- Anatomical considerations in conjunction with GBR and dental implant procedures
- Critical issues: nerve structures, blood vessels, sinus, nasal, orbital cavities
- Possible complications
- How to handle complications

Evening event

- Dinner at “Heuriger” in the “Grinzing” district

Friday, March 20, 2009

9am–5pm

Practical workshop on human cadaver specimens

- Preparation of the lingual artery, preparation of the nervus mandibularis, lateralization of the mental nerve
- Bone harvesting techniques, standard and piezo surgery, chin and retromolar block transplants, bone splitting

- Implant placement in extraction sockets and defect sites
- Sinus elevation, bone grafting
- Soft-tissue transplantation, tips & tricks

Saturday, March 21, 2009

9m–4pm

Theory and live demonstration

- Planning of complex implant cases
- 3D planning & guide fabrication
- Live surgery with the CAMLOG® guide
- Restorative aspects of guided implant placement
- Handling of complications
- Clinical results
- Certification ceremony

Information

Course Venue:

CMF Institute Vienna
CAMLOG Competence Center
Schumannngasse 15, A-1180 Wien

Anatomical Institute
of the Medical University of Vienna

Language:

English

Course Fee:

€1,700.00 including course materials,
coffee breaks, lunches and evening event
on Thursday

Number of Participants: max. 25

CE Credit:

25 points. (validated by Österreichische
Zahnärztekammer ZFP-ÖZÄK)

Accommodation:

Arcotel Boltzmann****
Boltzmannngasse 8, A-1090 Vienna
Phone: +43 1 316 12 0
Fax: +43 1 316 12 816
e-mail: boltzmann@arcotel.at
www.arcotel.at/boltzmann

Rates:

€ 80 single room, € 110 double room.
The rates per room/night incl. a breakfast
buffet and all service charges and taxes.

Hotel booking code: "CMF CAMLOG
Competence Center March 2009".
For reservation, please, contact the hotel
directly.

Registration:

CAMLOG Biotechnologies AG
Mrs. Gabriella Schraner
Margarethenstrasse 38, CH-4053 Basel
Phone: +41 61 565 41 52
Fax: +41 61 565 41 01
e-mail: gabriella.schraner@camlog.com

After registration, you will receive a detailed
list of those surgical instruments you should
take with you to the course. Consumable
materials (gown, head protection, mouth
protection, gloves etc.) will be provided by the
course organization.
